Research Associate - SARS-CoV2, Rosenberg Lab

The Rosenberg Lab at UCSF studies how microbial pathogens cause disease in humans. We use a combination of structural biology and microbial genetics to investigate the molecular underpinnings of the host-pathogen interface. Our goal is to uncover novel vulnerabilities that will enable faster, cheaper and less toxic treatment of infections.

We are currently seeking a Research Associate to join a motivated, and highly collaborative team to work on project related to the novel coronavirus, SARS-CoV2. The ideal candidate will have specific training in **cell culture techniques** and an ability to follow complex protocols with expensive reagents. Knowledge of molecular genetics (including genomic editing) and structural biology are a plus but are not required.

Specific Responsibilities Include:

- Cell culture
- Cell analysis (cell counting, FACS, etc.)
- Protein purification (prior experience not required)
- Some laboratory management duties, including ordering and preparing lab reagents

Requirements:

- BS/MS in Molecular and Cell Biology with relevant lab experience
- Extraordinary attention to detail and ability to follow protocols
- Must be highly collaborative, team-oriented, and an effective communicator
- Must have experience working with cell culture
- Experience with protein purification is a plus but not required
- Experience with genomic engineering is a plus but not required

This opportunity is full-time only. No contractors, consultancies or recruiters will be considered. UCSF is proud to be an equal opportunity employer and UCSF shall provide equal employment opportunities to all individuals without regard to race, color, national origin, religion, sex, gender, gender expression, gender identity, physical or mental disability, medical condition (cancer-related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age (over 40), sexual orientation, citizenship, pregnancy, or service in the uniformed services (as defined by the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA). Please see <https://policies.ucsf.edu/policy/150-12> [1] for specific policies to which we are strongly committed.
